

OUR MISSION

In order to protect public health and improve the quality of life;

- To provide preventive and therapeutic health services in high quality, in accordance with our ethical rules and principles,
- Being clear, honest, reliable and accessible,
- To provide services that make a difference via developing technology,
- To care for the rights and satisfaction of the patient, patient's relatives and employees, as we call them guests,
- To support the development of new knowledge and practices in the field of health through academic studies and scientific research.

OUR VISION

- To be a hospital network that competes with the best medical results in international area by applying up to date academic protocols and care pathways at every specialty area.
